TECHNICAL SKILLS

I develop applications and websites using different technologies: Java, PHP, Node JS, React JS, Firebase, Parse, HTML5, CSS, SQL & NoSQL DB's, AWS, Linux Debian / Ubuntu, MatLab and mathematical modeling.

SPOKEN LANGUAGES

Spanish is my mother tongue, English is my second language and I've studied German for 9 months.

WORK EXPERIENCE

Head of IT Department, RequiemMedia.com.ve - Sep/2011 - Oct/2016 - Venezuela

- Administration, development and implementation of requirements and IT solutions tailored to the company.
- Coordinate the support and administrative and operational control of the different computer systems and media.
- Creation and administration of ERP and CRM systems, with automation of the buying and selling process.

Web Developer/Sys Admin, Inflalo.com - May/2012 - Present - Venezuela

- Built the company's website implementing a WordPress+WooCommerce Solution.
- Maintain the VPS server and keep the products catalogue up-to-date.

EDUCATION

2012 B.Sc. in Chemical Engineering. University of Carabobo, Venezuela.

→ Specialist in scientific programming. Honors degree work entitled "EZ-Fluids UC: Free software for analysis and problem solving fluid mechanics".

2006 Linux Administrator. University of Carabobo, Venezuela.

→ Institute of Mathematics and Applied Calculus UC School of Engineering. Duration: 3 months. Approved 19/20 pts.

SIDE PROJECTS

[Humano Derecho](#): Android & Web apps. WordPress site hosted on a Debian VPS, using IceCast2 for live streaming, SoundCloud API for Podcasts, Zapier for push notifications, WP-JSON API for the news feed inside the Android App and Twitter API + CronTab for the #NowPlaying feature. This is my contribution for a Human Rights NGO.

[Venezuela Trivia](#): Android App users can have fun with, learning about Venezuela. It's been built in Android Studio using Google Firebase, Play Games Services and AdMob.

[Programadores.com.ve](#): Venezuelan Programmers Community, Code Bank and Job Listings. Self-hosted WordPress + CodeIgniter + Laravel. I use it as a display for Venezuelan Developers and as my personal Networking DB.
